

BELKIN®

Conserve Smart AV™ Auto-Off Surge Protector

Turns Off When Your TV Turns off

Save Energy Automatically

Now you can control power to your whole entertainment system with the push of a button—your TV's power button. The TV Master Socket senses when your TV is on or off and controls power to four peripheral sockets for your AV components. When you turn your TV off, power to the peripheral components goes off too—including standby power—so no energy is wasted.

Benefits

Simple Setup

Plug your TV into the green socket and your AV peripherals into the controlled sockets.

Saves Energy Automatically

The green socket detects the power state of your TV and automatically turns on/off DVD players, VCRs, game consoles, receivers, subwoofers etc.

Works with Cable/Satellite Boxes

2 Always-On Sockets for devices that need constant power.

Protects Sensitive Electronics

1800 joules of surge protection ensure electronics are safe from power spikes or surges.

Saves Space

Narrow footprint and wall-mounting holes make it easy to place behind furniture.
